BACKGROUND

The Moldova 2019 Violence Against Children and Youth Survey (VACS) was a nationally representative cross-sectional household survey of children and youth ages 13–24 years. The survey was designed to produce national estimates of experiences of physical, sexual, and emotional violence in childhood. The survey included a randomly selected, representative subset of the population, at one specific point in time, providing estimates of violence indicators by age group, sex, and other demographic factors. All data were collected through an in-person interview with trained interviewers. The survey also included an HIV testing component.

Through a Data Sharing Agreement, the government of Moldova provides access to public-use data for the Moldova 2019 VACS to inform efforts to fill gaps in understanding violence against children and youth and guide the development and implementation of prevention and response efforts. The purpose of this codebook is to guide how questions, responses and other derived indicators are coded in the dataset, to describe the layout and structure of the data file and to show the weighted and unweighted frequency of variables in the dataset.

Implementation

During the survey implementation, data were collected from participants ages 13–24 and the head of household who spoke one of the survey languages and could understand and respond to the survey questions. The head of household survey was short (lasting about 15 minutes) whereas the participant questions took about 45 minutes to complete (please see the **Data User Guide** for detailed information).

The Moldova VACS used a three-stage cluster sampling design. At first, the primary sampling units (PSUs) were selected from the national sampling frame separately for males and females. Then 25 eligible households were selected per PSU from which one eligible respondent was selected from each household to complete the questionnaire.

Sample size, response rate and weighting calculations

Please refer to the **Data User Guide** for detailed information about sample size calculation, Response Rates and weighting procedure for the Moldova VACS.

Skips

Several questions in the Moldova VACS had branching logic. Some of the questions were only applicable to a specific group of the population or based on responses to previous questions. Please refer to the questionnaire to see the skip logic.

Using the codebook

This codebook contains a separate section for female and male datasets. Each of the variables in the dataset has the following information as shown in the example below:

- Group
- SAS Variable Name
- Variable Label (e.g., Question, geographical location etc.)
- Values and labels
- Variable type (numeric, character)
- Storage mode (double, integer)
- Unweighted and/or weighted frequencies

Example:

Education ← **Group**

Q8A ← **Variable Name**

Variable Label
(question/description)

"During the 2017-2018 school year, were you taught in any of your classes how to avoid physical fights and violence?"

Storage mode: double
 Measurement: nominal
 Missing values: NA M

Unweighted frequency **Unweighted percent including missing values** **Weighted frequency**

Unweighted **Weighted**

Sexual Behavior

Q412

"The next set of questions is about your sexual activity and practices. Though sex is very private, we hope that you will share some information with us so we can better understand the needs and concerns of young adults like yourself. Some of these questions are personal but keep in mind that your name is not on the survey and no one else will know your answers. Please feel free to answer openly and honestly. There are no right or wrong answers, and remember that you can skip any question that you don't feel comfortable answering.

For the next few questions, "sex" or "sexual intercourse" refers to vaginal, oral or anal sex or the penetration of an object into your vagina or anus by someone else.

Have you ever had sex?"

SV2: Attempted Forced Sex

Q700A

"These next questions ask you about sex. By sex, I mean vaginal, oral or anal sex or the insertion of an object into your vagina or anus by someone else.

Has a boyfriend/intimate partner, ex-boyfriend/intimate partner, husband, or ex-husband ever tried to make you have sex against your will but did not succeed? They might have tried to physically force you to have sex or they might have tried to pressure you have sex through harassment, threats and tricks?"

SV2: Attempted Forced Sex

Q700A

"These next questions ask you about sex. By sex, I mean vaginal, oral or anal sex or the insertion of an object into your vagina or anus by someone else.

Has a girlfriend/intimate partner, ex-girlfriend/intimate partner, wife, or ex-wife ever tried to make you have sex against your will but did not succeed? They might have tried to physically force you to have sex or they might have tried to pressure you have sex through harassment, threats and tricks?"
